Disposable syringe-type Y-zone serum

Characteristics of Rejuvenation Secret Serum

1. In general, aging starts at the age of 35 in the uterus (including the vulva and vagina).

From this time, the vagina becomes less elastic. With further aging, it can get itchy and produces an unpleasant odor due to vaginitis. In addition, it can suffer from severe bacterial infections due to residues after menstruation.

However, most women tend to keep their vagina clean with feminine cleaner without having any understanding of the causes of such symptoms. Rejuvenation secret Serum is made with material that is believed to be effective in eliminating Candida albicans, the herpes virus, and HIV according to related studies.

Many women do not know that the pH (slightly acidic) is neutralized by a decrease in vaginal lubrication, vaginal dryness, and frequent showers as they grow older. A neutral pH creates an environment where bacteria easily proliferate. Beneficial bacteria are also eliminated. Under these circumstances, things could be acceptable for a while, but inflammation would worsen over time. When entering middle age (40-50s), women experience menopause. Vaginal dryness gets more serious, and the vagina becomes less elastic due to childbirth. Rejuvenation secret Serum keeps the vaginal pH slightly acidic with the use of lactic acid, normalizing the vaginal mucosa.

Containing a substance that encourages vaginal contraction, the product helps the vagina regain its elasticity. Therefore, it is very effective for women suffering from incontinence.

2. Apart from the vaginitis issue, middle-aged women in their 40-50s are far lower than young women in their 20-30s in terms of the frequency of sex.

Rejuvenation secret Serum is more lubricating than hot gel, and it reduces dyspareunia and enhances vaginal tightening. Therefore, it can help women and their partners reach orgasm.

3. Since the product is comprised of 99.7% natural ingredients, it is perfectly safe for use often without any concern about the accumulation of harmful substances.

4. If you experienced strong irritation when one piece is used, you can improve symptoms by using the product more.

Even though there are differences between individuals, if you keep using it for about a month, you can see great improvements in terms of vaginitis, inflammation, itching, offensive odor, incontinence, cystitis, and vaginal dryness. We recommend its intensive use over 2-3 months to maximize cell regeneration. After, you can use one piece every 7-10 days for maintenance.

5. Inject the serum into the vagina (1-2cm) one or two hour(s) before going to bed, using a syringe.

It is absorbed within 10 minutes in general.

If you inject the serum, lying on your back, it does not come out due to gravity. If it leaks into the vulva, do not wipe it off. Just gently rub and massage with your hand.

As the serum is absorbed within 10 minutes, and the waste in the vagina is discharged while the vaginal mucosa is being recovered. This discharge takes place during the first use only.

Inflammation, vaginal discharge, or bleeding could take place. Therefore, it is a good idea to put on a pantyliner or pad. Such symptoms mean that your body is regaining its health. There is nothing to worry about.

In summary: If the target is to remedy inflammation, it is recommended to use the product one or two hour(s) before going to bed. If the aim is to improve your sex life by taking care of vaginal elasticity and dryness, use the serum one hour before sex. If you are suffering from severe vaginal dryness, we recommend you to use the products immediately before sex. Before you resort to the hate-to-visit women's clinic, you can get some treatments through DR. Y SECRET Serum. If the symptoms are serious, or other issues are found, we recommend you to go and see your doctor.

What are the primary causes of Y-zone issues such as unpleasant smells and itching??

The Y-zone is comprised of sensitive mucous membranes and easily loses pH balance. The Rejuvenation Secret Serum is a slightly acidic (pH 4.5) high-concentration serum specially designed for the Y-zone, keeping pH balance. It is helpful in caring for the Y-zone.

In addition, it offers a lovely solution for married couples' healthy and energetic lifestyles through moisturizing and lubricating effects.

Sterilization test & clinical trials, certification of skin improvement effects

According to the sterilization test and clinical trials performed by the OATC Skin Clinical Trials Center, antifungal and antimicrobial effects on Candida albicans and general E. coli, respectively, were verified. A clear zone was formed in both strains, revealing definite antimicrobial effects.

In addition, no skin irritation was confirmed at the clinical trials.

Recommended to those!

- ♥ Concerned about itching or unpleasant smell
- ♥ Feel uncomfortable because of vaginal dryness during sex
- ♥ Repulsive smell with excessive vaginal discharge
- ♥ Needed to keep the Y-zone firm and elastic
- ♥ Suffer from urinary incontinence and other pelvic floor issues
- ♥ Looking for gentle and lovely sex
- ♥ Needed to build up self-confidence after childbirth
- ♥ Frequently wearing tight pants
- ♥ Work long periods of time from a chair

Directly applied to my body... more cautious and strict! Good ingredients from nature ONLY

1. Synthetic flavor-free natural essential oils
2. Safe formula in EWG Green Rating
3. 99.7% natural ingredients (including water)
4. Persistence upgraded with natural preservatives

How to Use

Remove along the dotted line on the transparent shrink film.

Pull the cap off from the body.

Gently apply the product onto the target area.

Good tips to use the product

When moisturizing the Y-zone,

Gently apply it onto the target area.
Lie down for about 10 minutes for absorption.
(Recommended to use one every 2-3 days)

When massaging the Y-zone,

Take a small amount and apply it onto the Y-zone.
Then, massage evenly.

* Do NOT use the product during pregnancy or menstruation.
